Subject: Please carry out justice!

It seems that Microsoft's power is overwhelming. Of course with a monopoly already illegally established, those people bound by that monopoly wish to see this case decided for Microsoft. They fail to see the long term effect or even stop to realize how many smaller innovative companies have been swallowed up by Microsoft and have disappeared from the horizon.

I find it ironic that one remedy proposed by our own DOJ would only INCREASE Microsoft's monopoly into that last frontier that has eluded them thus far....EDUCATION. And in this process hurts a truly innovative company, Apple Computer, which truly seems vested in helping schools.

Please don't let this juggernaut overwhelm you too and become just another lemming that has jumped off the cliff at Microsoft's beckoning. I have faith that you will carry out the appropriate justice. Microsoft's activity was deemed illegal. In my opinion the answer should not only include remedy but some punishment for their actions.

Thank you for your time and indulgence

"True eloquence consists of saying all that should be said, and that only."
